INTRODUCTION

Technical Preservation Services is pleased to present the eighth annual directory of training opportunities in cultural resource management.

This directory identifies workshops, courses, seminars, and other short (up to six-weeks in length) classes in cultural resource management topics sponsored in the United States and abroad for calendar year 1998. Information for the directory was obtained from a survey mailed to CRM readers and nearly 1,000 representatives of Federal, state, and local government agencies, colleges and universities, and organizations.

THIS YEAR’S DIRECTORY

The first section of the directory, Course Listings, provides descriptions of each course and is organized by categories of related disciplines.

Some courses provide information about a wide range of topics. For example, a course might include planning issues, legal requirements, community and neighborhood history, and preservation treatments. Such courses are listed in the section: Courses of Interest to More Than One Specialty, rather than in numerous individual sections of the directory.

More specialized courses are listed under one or two categories. If a course contains information about several subcategories within one discipline, it will be listed under the umbrella category heading. For example, if a course includes information about historic architecture, interior design, and architectural treatments, the course will be found under Historic Building Related Specialties. Listings are arranged by date within each category.

The second section of the directory, Location Index, enables the reader to find course information in a specific geographic location. Each entry provides the subject, course title, and date.

TBA (To Be Announced) appears when exact information regarding date, location, cost, or course description was not available.

The Intended Audience information indicates who is eligible to attend a course. Generally, course sponsors develop a course for a specific audience, and these courses may or may not be available to others who are interested but outside of targeted organizations.

The succinct course descriptions provided here characterize the key elements of a course. Class size varies, and some of the hands-on courses may allow only a very limited number of students due to the individual instruction format. Please contact the course sponsor for complete course descriptions and to determine class size and course availability.

Unless otherwise stated, the cost includes course fee or tuition only. Participants must pay for travel to and from the course and for any lodging and meals.

Where indicated by the course sponsor, “CEU” or “college credit available” is noted with the course cost. Continuing Education Units (CEUs) are recognized units that document completion of a qualified continuing education program and may be used for job advancement or as evidence of increased professional capabilities. Participants should confirm the availability of such credits, and any special fees that may apply, with the course sponsor.

Listing in this directory does not imply endorsement of the course content, the instructor, or the course sponsor by the National Park Service or the U.S. Department of the Interior. Every effort has been made to provide accurate information, but scheduled training may change at any time, and early contact with the course sponsor is advised.

The directory is published in conjunction with CRM, which is regularly sent to Federal Preservation Officers and State Historic Preservation Offices; National Park Service parks and central offices; Federal, state, and local government agencies and certified local governments; museums; national and regional preservation organizations; preservation programs at colleges and universities; tribal leaders and cultural centers; professionals in the cultural resource fields; and interested individuals.

This directory is produced by the Technical Preservation Services Branch of the Heritage Preservation Services Division, National Park Service. For more information, please write Training Directory, Heritage Preservation Services, Room NC200, 1849 C Street, NW, Washington, DC 20240, or telephone 202-343-9583.

Now Online

The Cultural Resource Training Directory is now online. See Page 16 for more information and the URL address.

DEGREE PROGRAMS
The Directory of Cultural Resource Education Programs at Colleges, Universities, Craft and Trade Schools in the United States (1994-95), a joint project of the National Park Service and the National Council for Preservation Education, provides information about training programs and education programs that last from six months to several years. With information about 112 programs, including faculty, tuition, curriculum, degree / certificates offered, length of program, and contacts for more information, the directory is intended for students at the high school or college undergraduate level and their counselors and advisors. Readers are referred to twenty-seven supplemental guides and directories for information regarding additional programs.

The directory is available from the Government Printing Office (stock number 024-005-01146-3) for $9 per copy (shipping and handling included). Credit card orders may be placed by telephone to 202-512-1800, or by mail to:

Superintendent of Documents
PO Box 371954
Pittsburgh, PA 15250-7954

It is also available through Government Printing Office Bookstores in Atlanta, GA; Birmingham, AL; Boston, MA; Chicago, IL; Cleveland, OH; Columbus, OH; Dallas, TX; Denver, CO; Detroit, MI; Houston, TX; Jacksonville, FL; Kansas City, MO; Laurel, MD; Los Angeles, CA; Milwaukee, WI; New York, NY; Philadelphia, PA; Pittsburgh, PA; Portland, WA; Pueblo, CO; San Francisco, CA; Seattle, WA; and Washington, DC.

INTERNATIONAL TRAINING OPPORTUNITIES
Information on courses offered by the International Center for the Study of Preservation and Restoration of Cultural Property (ICCROM), Rome, Italy, may be obtained from:

ADDITIONAL WAYS TO FIND TRAINING
The people and organizations listed as contacts in this directory are useful starting points for tracking down more information about training in the subject areas of their courses. They may also be familiar with the availability of future training and may have scheduled additional courses that did not meet the deadline for this directory.

Check with local academic institutions for class offerings. Colleges that offer degree programs in cultural resource subjects may allow individuals to take a class without enrolling in a degree program.

Check future issues of CRM for newly announced notices of training offerings and conferences with training sessions.

The World Wide Web now features many sites with further information on cultural resource training programs. Some of these evolving information services are more comprehensive than others. Many also point to other sources of information on cultural resource topics and training opportunities. Among the web sites with cultural resource training information are:

- Links to the Past, the home page of the National Park Service’s cultural resource management programs, http://www.cr.nps.gov. Select “Help Yourself,” then “Training.”

- PreserveNet, the web site of the Historic Preservation Program at Cornell University, at http://www.preservenet.cornell.edu where you can find information about “Conferences,” “Education,” and “Internships.”

- The home page of the National Trust for Historic Preservation can be entered at http://www.nthp.org. Select “Main Street,” then “Conferences & Workshops.”
